Experience

Ene

Python, Flask

November 2022

Web application that replaces the work of a waiter, sending your order directly to the restaurant you're dining in, allowing you and the restaurants to save time, optimize the ordering process and keep track of current and past orders.

Awason

Dart, Flutter

March 2023

Mobile application for delivery of gallons of water, facilitates the communication between carriers and clients while having useful features such as history of orders, automated and/or last-minute requests, etcetera.

Pokédex

JavaScript, HTML, CSS

April 2022

Web application that simulates a pokédex, providing information regarding the various species of Pokemon by consuming an API and displaying the data returned.

Skills & Proficiencies

Programming

- Python (Django, Flask)
- Dart (Flutter)
- JavaScript (React)

Databases

- MySQL, PostgreSQL, MongoDB, Firebase

Version control

- Git

Languages

- Spanish (native)
- English (advanced)

Educational Background

Bachelor of Systems Information Engineering

Institution: Universidad de Sonora

Expected Year of Graduation: 2022

Volunteer Work

Participant in Launch X Program

Institution: Microsoft

2022

I developed multiple applications, expanding my frontend and backend abilities using JavaScript.
